Release Notes V3.5

Version 3.5 released 11-26-2009

- 1. Corrected an issue with the temperature showing twice when there was no wind chill or heat index temperature.**
- 2. You can now select between report type "text" or "xml". The Weather Message archive option "Selected No Head" will need to be used to archive the "xml" type as pure xml.**
- 3. You can now select the color used to display the temperature in the system tray.**
- 4. Added new screen for selecting the station. This screen now allows you to enter a file name.**
- 5. Added the ability to create a 150 x 150 pixel graphic. The program will use the file name entered and add ".png" for the extension.**
- 6. Updated the sites file with the latest metar sites.**
